

#### BB103 REQUIREMENTS COMPARISON

NOTES ON BB103 COMPARISON

COMPARISON SCHEDULE OF ACCOMMODATION

SITE AREAS COMPARISON

The table on the following page campares the existing situation at Mascalls Academy to the requirements of the DFE Building Bulletin 103.

The schedule of accommodation tool used is version 'Schedule of Accommodation (SoA) tool (Secondary) version 8.3' dated December 2023, which is the current document at this time. Please refer to the appendices for these schedules.

As noted previously, the school capacity numbers used are as follows.

Existing school capacity

8FE (1200 11 to 16 year old places) plus 250 6th form places Total capacity : 1450  $\,$ 

Proposal A - 3FE Expansion

11FE (1650 11 to 16 year old places) plus 330 6th form places Total capacity : 1980

Proposal B - 2FE Expansion

10FE (1500 11 to 16 year old places) plus 305 6th form places Total capacity : 1805

COMPARISON SCHEDULE PROPOSAL TO BB103 REQUIREMENTS

NOTES ON COMPARISON

<u>.</u>

PROPOSAL A - 3FE EXPANSION

Proposal A - 3FE Expansion is to accommodate a pupil capacity as follows:

expansion on the Mascalls Academy site.

The drawings on the following pages show a preliminary proposal to accommodate a 3FE

11FE (1650 11 to 16 year old places) plus 330 6th form places

Total capacity: 1980

Leigh Academies Trust have been consulted on the proposed expansion, and this proposal takes into account the priorities set out by the Trust for the site in terms of existing buildings and spaces which are not currently fit for purpose.

There has been ongoing consultation throughout the development of these preliminary proposals through meetings held with the Trust. There have also been meetings with Tunbridge Wells Borough Council and Kent County Council.

The proposal uses a combination of demolition, remodelling of existing buildings and new build construction create the appropriate amount of area to accommodate a 11FE school on the site.

#### Site Areas -

Whilst the overall site area can accommodate the 3FE expansion, the specific area for 'soft outdoor PE' is below that recommended within BB103. Through consultation with Leigh Academy Trust it was acknowledged that the prefered option would be as shown within this report for a new all weather sports pitch (which counts as double the area towards the BB103 requirements) to be provided close to the existing sports facilities. As shown in the table on the site areas drawing, this provides slightly less 'soft outdoor PE' area than set out in BB103 for a new school facility, and therefore a derogation would be needed. An option was discussed where grass pitches were to be provided at the south of the site on the sloped land, where there is enough land to the provide the 'soft outdoor PE' area to meet the BB103 requirements, however this was not ideal educationally for the Trust as the pitches would be removed from the existing sports areas.

There is the potential for the proposed new all weather sports pitch facility to be open to community use through the school's existing booking system.

The location of the proposed all weather sports pitch would mean that the gradient across the pitch can meet national guidelines for sports facilities.

Car Parking -

A new car park is proposed linked to the existing vehicle entrance into the site from Mascalls Court Road which is proposed to be brought into use. This car park replaces the existing car parking area where the new science building is proposed to be located. This car park is would be well located to serve the sports facilities. As the project design develops there will need to be a dialogue with Kent County Council Highways for consultation on the vehicle entrance and junction requirements.

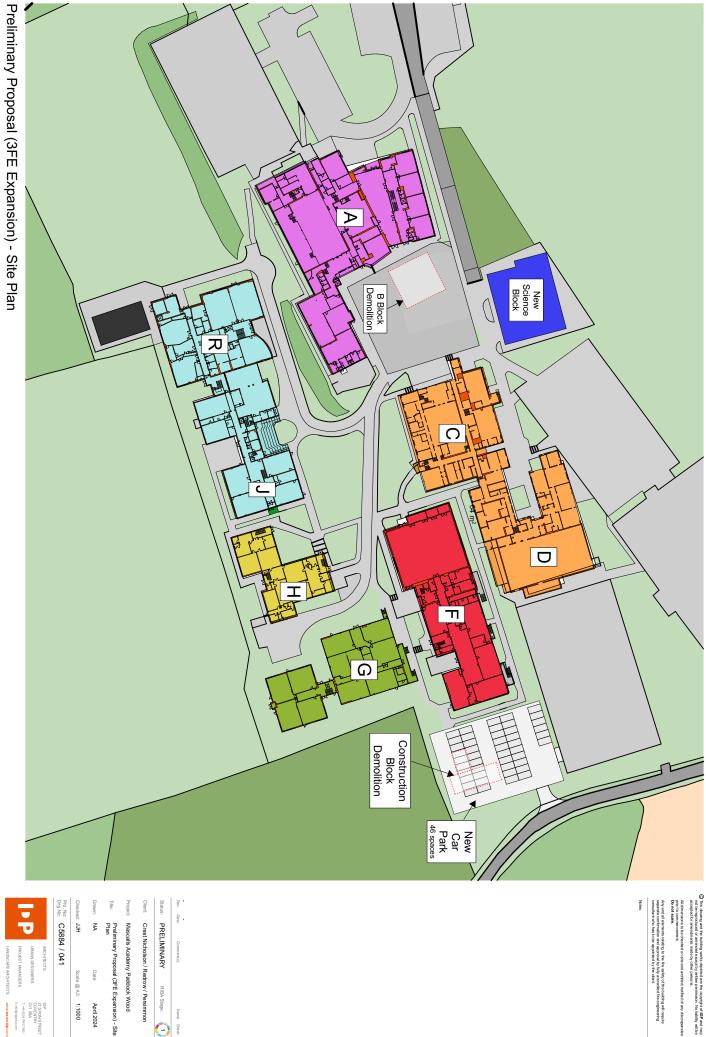

The construction of this new car park will require the removal of some existing low quality trees and vegetation. As the project develops an Ecologist would need to be consulted.

The estimated new staff number is 121 full time equivalent (FTE) staff at 11FE - as noted previously, this is based on the existing 88 FTE staff increased pro rata. The Kent County Council parking standards set out a ratio of 1 space per member of staff plus 10%. This would equate to 134 parking spaces. These are accommodated within the proposals within the existing and proposed new replacement car park.

hasing .

Phasing dates are based on preliminary projected pupil number increases based on indicative housing delivery programme. Please see table within report document appendices.

These dates are subject to any amendments to the overall housing development project timeline, housing delivery rates, and continuing discussions with the academy trust.

# NOTES ON COMPARISON OF 3FE PROPOSAL TO BB103 REQUIREMENTS

PROPOSAL A - 3FE EXPANSION

an overview of how the proposal meets the requirements of BB103.

The proposal is based on a 3FE expansion to bring the school capacity up to a total of 1980.

This page provides a commentary on the comparison schedule on the previous page, and gives

pupils (1650 i.e. 11FE 11-16 year olds, and 330 sixth form places)

# GROSS INTERNAL FLOOR AREA (GIFA)

The existing GIFA is 15,942m<sup>2</sup>.

To accomodate the expanded 1980 capacity school, BB103 recommends a GIFA between 14,105 - 16,006m<sup>2</sup>.

The proposal includes the demolition of B Block, and the construction of a new Science block, and the proposed GIFA would be 17,345m².

The reasons for the overall floor area being higher than the BB103 recommendations are there a number of existing spaces that would be above the BB103 requirements for a new build school, for example the additional sports hall.

# GENERAL TEACHING CLASSROOMS

The existing school has a total of 49 general teaching rooms (general classrooms and seminar rooms), combining to give a total floor area of 2834m². The existing rooms vary widely in floor area ranging from as low as 24m² through to 157m² across the school.

To accomodate the expanded 1980 capacity school, BB103 recommends:

 $4 \times 41 \text{m}^2$  seminar rooms, and  $49 \times 55 \text{m}^2$  general classrooms, combined to give a total floor area of  $2859 \text{m}^2$ .

The proposal is to refurbish the existing G Block (previously science) to provide additional general teaching classrooms and seminar rooms at the recommended room areas.

The proposals also include the refurbishment of the existing general classrooms at the first floor of J Block (which include the smallest existing classrooms) to provide a new Library area, and the refurbishment of the existing library to provide additional general teaching rooms.

The proposal would provide a total of 53 general teaching rooms, combining to give a total floor area of 3010m², which meets the number of rooms and gives additional floor area compared to those set out in BB103 for a new school.

### ICT / BUSINESS STUDIES

The existing school has a total of 7 ICT / Business Studies classrooms, combining to give a total floor area of  $532m^2$ .

To accommodate the expanded 1980 capacity school, BB103 recommends:

 $6\times69m^2$  ICT-rich classrooms, and  $1\times69m^2$  business studies rooms, combined to give a total floor area of  $483m^2$ .

The proposal includes the refurbishment of one of the existing ICT rooms at the ground floor of J Block to provide an addtional Art classroom.

A new ICT classroom is provided within the refurbishment of G Block.

The proposal would provide a total of 7 ICT / Business Studies classrooms, combined to give a total of 527m², which meets the number of rooms and gives additional floor area compared to those set out in BB103 for a new school.

#### SCIENCE

The existing school has a total of 11 Science Laboratories, combining to give a total floor area of 898m².

To accomodate the expanded 1980 capacity school, BB103 recommends: 12 x 83m² general science laboratories, and 3 x 97m² specialist science laboratories combined to give a total floor area of 1287m².

The proposal includes the construction of a new science block, providing 13 new science laboratories ( $11 \times 83$ m², and  $2 \times 97$ m²) along with science prep rooms a staff office and WC facilities.

The 2 existing science laboratories in F Block are proposed to be retained.

The proposal would provide a total of 15 science laboratories, combined to give a total of 1287m², which meets the number of rooms and floor area compared to those set out in BB103 for a new school.

#### ART

The existing school has a total of 2 art classroom, combining to give a total floor area of 309m². The existing art rooms are very large in comparison to the BB103 recommended floor areas, one is the equivilent of two classrooms joined together.

To accomodate the expanded 1980 capacity school, BB103 recommends: 2 x 83m² general art rooms, and 3 x 97m² 3D art rooms, combined to give a total floor area of 457m².

The proposal is to retain the existing art rooms, and provide 2 additional art rooms through refurbishment of an existing ICT room in J Block, and the reducing the size of one existing very large graphics technology room in R Block.

The proposal would provide a total of 5 art rooms (counting one of the existing rooms which is the equivalent of two rooms as two rooms), combined to give a total of 475m², which meets the number of rooms and gives additional floor area compared to those set out in BB103 for a new school.

# NOTES ON COMPARISON OF 3FE PROPOSAL TO BB103 REQUIREMENTS

PROPOSAL A - 3FE EXPANSION

#### MUSIC + DRAMA

The existing school has a total of 5 music and drama rooms, combining to give a total floor area of 481 m².

To accomodate the expanded 1980 capacity school, BB103 recommends:

 $4 \times 69 m^2$  music rooms,  $1 \times 83 m^2$  music + drama rooms and  $1 \times 97 m^2$  drama studio, combined to give a total floor area of  $456 m^2$ .

The proposal is to retain the existing rooms, and provide 2 additional music rooms through refurbishment of an existing classroom in J Block.

The proposal would provide a total of 7 music and drama rooms, combined to give a total of 619m², which meets the number of rooms and gives additional floor area compared to those set out in BB103 for a new school.

#### DESIGN + TECHNOLOGY

The existing school has a total of 9 design and technology rooms, combining to give a total floor area of 1056m². The school has a large overprovison in comparison to the BB103 recommendations.

To accomodate the expanded 1980 capacity school, BB103 recommends:

 $1 \times 111$ m² D+T workshop,  $1 \times 97$ m² D+T workshop,  $2 \times 97$ m² food rooms,  $2 \times 83$ m² graphics rooms and  $1 \times 83$ m² textiles rooms, combined to give a total floor area of 651m².

The proposal is to retain the existing rooms, with one of the very large graphics classrooms to reduce in size to provide an additional art room.

The proposal would provide a total of 9 design and technology rooms, combined to give a total of 1022m², which gives an additional number of rooms and additional floor area compared to those set out in BB103 for a new school.

#### LARGE SPACES

The existing school has a total of 8 large spaces, combining to give a total floor area of 2270m<sup>2</sup>. The school has a large overprovison in comparison to the BB103 recommendations, including an additional sports hall.

To accomodate the expanded 1980 capacity school, BB103 recommends:

 $1 \times 254$ m² main hall,  $1 \times 594$ m² sports hall,  $2 \times 180$ m² activity studios,  $1 \times 446$ m² dining space and  $1 \times 139$ m² sixth form social space, combined to give a total floor area of 1793m².

The proposal is to retain the existing rooms, with the sixth form social space to reduce in size to provide an additional sixth form study area.

The proposal would provide a total of 8 large spaces, combined to give a total of 2185m², which gives an additional number of rooms and additional floor area compared to those set out in BB103 for a new school.

WE ARE IDF

## LEARNING RESOURCE AREA

The existing school has a total of 15 learning resource areas, combining to give a total floor area of 379m².

To accomodate the expanded 1980 capacity school, BB103 recommends:

 $1 \times 251 \text{m}^2$  library and  $1 \times 90 \text{m}^2$  sixth form study area, along with smaller rooms such as group rooms and music practice rooms, a total of 30 rooms, combined to give a total floor area of  $650 \text{m}^2$ 

The proposal is to provide an additional sixth form study area, by remodelling the existing sixth form social space reducing in size. The proposal provides a new library facility by remodelling existing general teaching rooms in J Block.

The proposal would provide a total of 15 learning resource spaces, combined to give a total of 631m², which gives a lower number of rooms and slightly less floor area compared to those set out in BB103 for a new school. This is due to a large requirement for music practice rooms in a new school of this size - it was discussed that these small rooms would be less of a priority to the school during this expansion in comparison to the teaching rooms. There is also scope within the overall buildings GIFA, in existing office or store spaces (which there is an overprovision of in comparison to the BB103 recommendations) to provide these small resource rooms.

NOTES ON COMPARISON

# NOTES ON 2FE EXPANSION PROPOSAL PROPOSAL B - 2FE EXPANSION

The drawings on the following pages show a preliminary proposal to accommodate a 3FE

expansion on the Mascalls Academy site.

Proposal B - 2FE Expansion is to accommodate a pupil capacity as follows:

10FE (1500 11 to 16 year old places) plus 305 6th form places

Total capacity: 1805

Leigh Academies Trust have been consulted on the proposed expansion, and this proposal takes into account the priorities set out by the Trust for the site in terms of existing buildings and spaces which are not currently fit for purpose.

There has been ongoing consultation throughout the development of these preliminary proposals through meetings held with the Trust. There have also been meetings with Tunbridge Wells Borough Council and Kent County Council.

The proposal uses a combination of demolition, remodelling of existing buildings and new build construction create the appropriate amount of area to accommodate a 10FE school on the site.

#### Site Areas

Whilst the overall site area can accommodate the 2FE expansion, the specific area for 'soft outdoor PE' is below that recommended within BB103. Through consultation with Leigh Academy Trust it was acknowledged that the prefered option would be as shown within this report for a new all weather sports pitch (which counts as double the area towards the BB103 requirements) to be provided close to the existing sports facilities. As shown in the table on the site areas drawing, this provides enough 'soft outdoor PE' area to meet the BB103 recommendations.

There is the potential for the proposed new all weather sports pitch facility to be open to community use through the school's existing booking system.

The location of the proposed all weather sports pitch would mean that the gradient across the pitch can meet national guidelines for sports facilities.

Car Parking -

A new car park is proposed linked to the existing vehicle entrance into the site from Mascalls Court Road which is proposed to be brought into use. This car park replaces the existing car parking area where the new science building is proposed to be located. This car park is would be well located to serve the sports facilities. As the project design develops there will need to be a dialogue with Kent County Council Highways for consultation on the vehicle entrance and junction requirements.

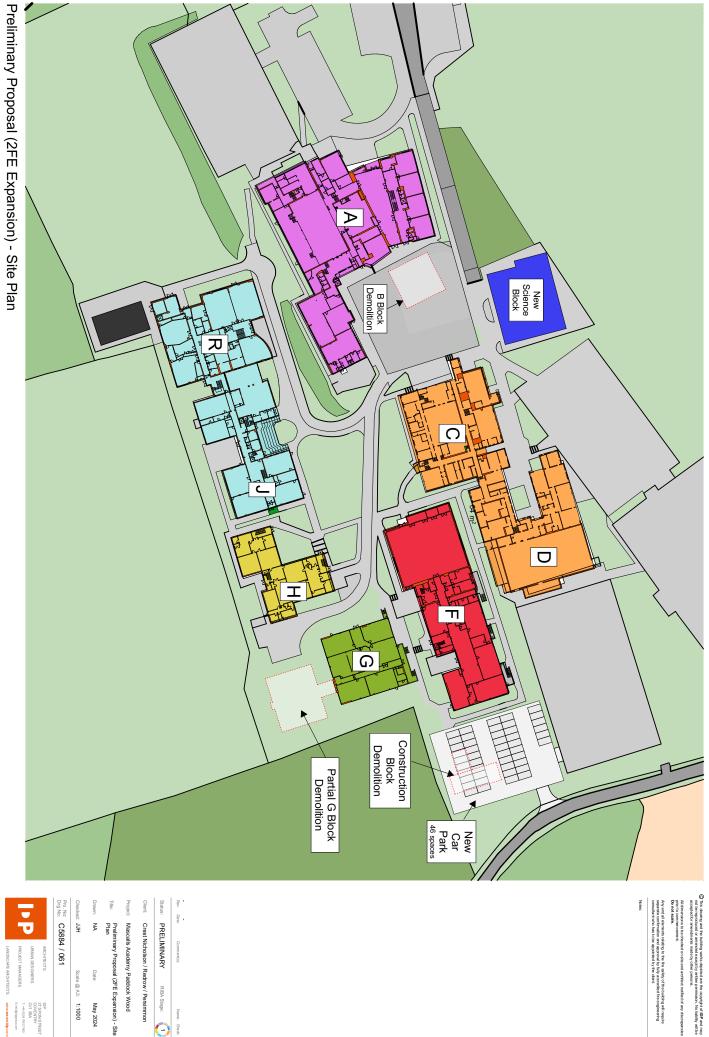

The construction of this new car park will require the removal of some existing low quality trees and vegetation. As the project develops an Ecologist would need to be consulted.

The estimated new staff number is 110 full time equivalent (FTE) staff at 10FE - as noted previously, this is based on the existing 88 FTE staff increased pro rata. The Kent County Council parking standards set out a ratio of 1 space per member of staff plus 10%. This would equate to 121 parking spaces. These are accommodated within the proposals within the existing and proposed new replacement car park.

hasing -

Phasing dates are based on preliminary projected pupil number increases based on indicative housing delivery programme. Please see table within report document appendices.

These dates are subject to any amendments to the overall housing development project timeline, housing delivery rates, and continuing discussions with the academy trust.

# NOTES ON COMPARISON OF 2FE PROPOSAL TO BB103 REQUIREMENTS

PROPOSAL B - 2FE EXPANSION

This page provides a commentary on the comparison schedule on the previous page, and gives an overview of how the proposal meets the requirements of BB103.

The proposal is based on a 2FE expansion to bring the school capacity up to a total of 1805 pupils (i.e. 1500 10FE 11-16 year olds, and 305 sixth form places).

# GROSS INTERNAL FLOOR AREA (GIFA)

The existing GIFA is 15,942m<sup>2</sup>.

To accomodate the expanded 1805 capacity school, BB103 recommends a GIFA between 12,985m² - 14,744m².

The proposal includes the demolition of B Block, the partial demolition of G Block and the construction of a new Science block, and the proposed GIFA would be 16,959m².

The reasons for the overall floor area being higher than the BB103 recommendations are there a number of existing spaces that would be above the BB103 requirements for a new build school, for example the additional sports hall.

# GENERAL TEACHING CLASSROOMS

The existing school has a total of 49 general teaching rooms (general classrooms and seminar rooms), combining to give a total floor area of 2834m². The existing rooms vary widely in floor area ranging from as low as 24m² through to 157m² across the school.

To accomodate the expanded 1805 capacity school, BB103 recommends:

 $4 \times 41 \text{m}^2$  seminar rooms, and  $45 \times 55 \text{m}^2$  general classrooms, combined to give a total floor area of  $2639 \text{m}^2$ .

The proposal is to refurbish part of the existing G Block (previously science) to provide additional general teaching classrooms at the recommended room areas.

The proposals also include the refurbishment of the existing general classrooms at the first floor of J Block (which include the smallest existing classrooms) to provide a new Library area, and the refurbishment of the existing library to provide an additional science lab.

The proposal would provide a total of 49 general teaching rooms, combining to give a total floor area of 2909m², which meets the number of rooms and gives additional floor area compared to those set out in BB103 for a new school.

### ICT / BUSINESS STUDIES

The existing school has a total of 7 ICT / Business Studies classrooms, combining to give a total floor area of  $532m^2$ .

To accommodate the expanded 1805 capacity school, BB103 recommends:  $6 \times 69 \text{m}^2$  ICT-rich classrooms, and  $1 \times 69 \text{m}^2$  business studies rooms, combined to give a total floor area of  $483 \text{m}^2$ .

The proposal includes the refurbishment of one of the existing ICT rooms at the ground floor of J Block to provide an additional Art classroom.

A new ICT classroom is provided within the refurbishment of G Block.

The proposal would provide a total of 7 ICT / Business Studies classrooms, combined to give a total of 527m², which meets the number of rooms and gives additional floor area compared to those set out in BB103 for a new school.

#### SCIENCE

The existing school has a total of 11 Science Laboratories, combining to give a total floor area of 898m<sup>2</sup>.

To accomodate the expanded 1805 capacity school, BB103 recommends: 11 x 83m² general science laboratories, and 3 x 97m² specialist science laboratories combined to give a total floor area of 1204m².

The proposal includes the construction of a new science block, providing 13 new science laboratories  $(11 \times 83\text{m}^2, \text{ and } 2 \times 97\text{m}^2)$  along with science prep rooms a staff office and WC facilities.

The existing library in C Block is proposed to be refurbished to provide an additional science laboratory.

The proposal would provide a total of 14 science laboratories, combined to give a total of 1196m², which meets the number of rooms and floor area compared to those set out in BB103 for a new school.

#### ART

The existing school has a total of 2 art classroom, combining to give a total floor area of 309m². The existing art rooms are very large in comparison to the BB103 recommended floor areas, one is the equivilent of two classrooms joined together.

To accomodate the expanded 1805 capacity school, BB103 recommends: 2 x 83m² general art rooms, and 3 x 97m² 3D art rooms, combined to give a total floor area of 457m².

The proposal is to retain the existing art rooms, and provide 2 additional art rooms through refurbishment of an existing ICT room in J Block, and the reducing the size of one existing very large graphics technology room in R Block.

The proposal would provide a total of 5 art rooms (counting one of the existing rooms which is the equivalent of two rooms as two rooms), combined to give a total of 475m², which meets the number of rooms and gives additional floor area compared to those set out in BB103 for a new school.

# NOTES ON COMPARISON OF 2FE PROPOSAL TO BB103 REQUIREMENTS

PROPOSAL B - 2FE EXPANSION

#### MUSIC + DRAMA

The existing school has a total of 5 music and drama rooms, combining to give a total floor area of 481m².

To accomodate the expanded 1805 capacity school, BB103 recommends:

2 x 69m² music rooms and 1 x 97m² drama studio, combined to give a total floor area of 235m²

The proposal is to retain the existing music and drama classrooms, as these provide additional rooms and floor area compared to those set out in BB103 for a new school.

#### DESIGN + TECHNOLOGY

The existing school has a total of 9 design and technology rooms, combining to give a total floor area of 1056m². The school has a large overprovison in comparison to the BB103 recommendations.

To accomodate the expanded 1805 capacity school, BB103 recommends: 1 x 111m² D+T workshop, 1 x 97m² D+T workshop, 2 x 97m² food rooms, 1 x 83m² graphics

rooms and 1 x 83m² textiles rooms, combined to give a total floor area of 568m².

The proposal is to retain the existing rooms, with one of the very large graphics classrooms to reduce in size to provide an additional art room.

The proposal would provide a total of 9 design and technology rooms, combined to give a tota of 1022m², which gives an additional number of rooms and additional floor area compared to those set out in BB103 for a new school.

#### LARGE SPACES

The existing school has a total of 8 large spaces, combining to give a total floor area of 2270m<sup>2</sup>. The school has a large overprovison in comparison to the BB103 recommendations, including an additional sports hall.

To accomodate the expanded 1805 capacity school, BB103 recommends: 1 x 254m² main hall, 1 x 594m² sports hall, 2 x 180m² activity studios, 1 x 472m² dining space and 1 x 132m² sixth form social space, combined to give a total floor area of 1812m².

The proposal is to retain the existing rooms, with the sixth form social space to reduce in size to provide an additional sixth form study area.

The proposal would provide a total of 8 large spaces, combined to give a total of 2185m², which gives an additional number of rooms and additional floor area compared to those set out in BB103 for a new school.

## LEARNING RESOURCE AREA

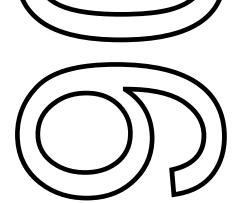

The existing school has a total of 15 learning resource areas, combining to give a total floor area of 379m².

To accomodate the expanded 1805 capacity school, BB103 recommends: 1 x 230m² library and 1 x 83m² sixth form study area. along with smaller rooms s

 $1 \times 230 \text{m}^2$  library and  $1 \times 83 \text{m}^2$  sixth form study area, along with smaller rooms such as group rooms and music practice rooms, a total of 20 rooms, combined to give a total floor area of  $5.17 \text{m}^2$ 

The proposal is to provide an additional sixth form study area, by remodelling the existing sixth form social space reducing in size. The proposal provides a new library facility by remodelling existing general teaching rooms in J Block.

The proposal would provide a total of 15 learning resource spaces, combined to give a total of 631m², which gives a lower number of rooms and but additional floor area compared to those set out in BB103 for a new school. There is scope within the overall buildings GIFA, in existing office or store spaces (which there is an overprovision of in comparison to the BB103 recommendations) to provide additional small resource rooms.

# REVIEW AND

REVIEW + SUMMARY

The brief for this feasibility report was to:

- Review the existing size of site and building capacity areas.
- expansion to the school by either 2 or 3 forms of entry. - Following this review to advise on the suitability of the Mascalls Academy site and buildings to allow

The report has been based upon the following staff and pupil numbers:

Existing school capacity:

8FE (1200 11 to 16 year old places) plus 250 6th form places

Total pupil capacity: 1450

We have been advised by Leigh Academies Trust that there are 88 full time equivalent staff at Mascalls Academy.

Proposal A - 3FE Expansion

11FE (1650 11 to 16 year old places) plus 330 6th form places

Total capacity: 1980

We have taken the existing staff number and pro rated this to estimate that there will be 121 staff full time equivalent staff at 11FE.

Proposal B - 2FE Expansion:

10FE (1500 11 to 16 year old places) plus 305 6th form places

Total capacity: 1805

equivalent staff at 10FE. We have taken the existing staff number and pro rated this to estimate that there will be 110 staff full time

A review of the existing building and site areas in comparison the the requirements set out the Building Bulletin existing, however there are some existing spaces which are not fit for purpose. 103 shows that the Mascalls Academy site size can accommodate an expansion of either 2FE or 3FE as

which can be accommodated on the Mascalls Academy site Proposals have been developed to provide accommodation to house either a 3FE or 2FE expansion, both of

proposals, with meetings held alongside Tunbridge Wells Borough Council and Kent County Council. The additional accommodation requirements can be met for a 3FE expansion." "We also agree that the preliminary drawings shared demonstrate an indicative working model that the early proving exercise to show that the expansion can be accommodated on the site: Trust confirmed within an email dated 25th April 2024, that the preliminary proposals are acceptable as an There have been ongoing consultation with Leigh Academies Trust through the development of these

Subject: Re: FW: C5884 Mascalls Academy - Proposals

Hi Judith

Following on from our conversation this week I have caught up with the CEO regarding our discussion next week:

The CEO has authorised me to act on LAT's behalf to comment that in principle we are keen to explore the 3FE expansion of Mascalls albeit 2FE or 4FE would be more efficient for us in terms of operation. We also agree that the preliminary drawings shared demonstrate an indicative working model that the additional accommodation requirements can be met for a 3FE expansion.

The CEO has commented that additional dining space is an absolute priority for us and is keen to explore how this can be accommodated.

Hope this helps.

Kind Regards

Phil Whittall MSc **Estates Director**

Dear Judith

# **Mascalls Academy**

Thank you for reaching out and providing clarification on the points raised by Tunbridge Wells Borough Council. Here's our response to each query:

# i) Involvement in Feasibility Assessment and Agreement with School Plan:

LAT confirms that our team has been actively involved throughout the Feasibility Assessment process, expansion of the Academy, funded by Crest Nicholson, Persimmon and Redrow. The design team has carefully considered both the space requirements outlined in published guidance and the operational requirements identified by the Trust and academy. This includes considerations for effective supervision, dining arrangements, grouping of subject areas, and security measures.

While Mascalls Academy currently possesses the space required for expansion, the existing layout suffers from a history of poorly planned but necessary increases in floor area. This has resulted in areas that are no longer fit for purpose in terms of modern teaching and learning practices, often due to their being undersized or poorly laid out.

Preliminary drawings and phase plans have been shared with LAT. These plans reflect the academy's operational needs and demonstrate that the proposed pupil numbers can be accommodated and would benefit from the development. Additionally, LAT has shared the academy's condition survey with the design team, who have factored a number of high risk items into the proposals. The planned expansion effectively addresses issues related to the outdated science facilities and the time-served asbestos-containing CLASP building.

Based on this comprehensive process, LAT agrees in principle with the high-level plan for Mascalls Academy's future development.

# ii) Community Use Agreement and Positive Impact on Sports Offer:

Mascalls Academy already boasts a strong relationship with the local community, with residents actively utilising the academy's facilities. We believe the proposed expansion plans will further enhance the existing sports facilities and offerings, bringing positive benefits to the wider community. Community groups and sports clubs are able to access the facilities outside of academy hours in evenings, weekends and during school holidays. Any additional sporting facilities delivered as part of this scheme will be made available as per the existing arrangements.

Leigh Academies Trust partners with Vivify Ventures, a supply-chain partner passionate about building thriving communities with healthier and happier individuals. Vivify will be responsible for marketing the expanded community use opportunities. We are happy to enter into discussions regarding an amended community use agreement as the proposals for the expansion of Mascalls Academy develop.

We welcome further discussions and are happy to provide any additional information that may assist in your decision-making process.

Yours sincerely

Phil Whittall Estates Director

### Land North East and South East of Paddock Wood

## Suggested changes to policy STR/SS1

Annotations as follows: New suggested text Suggested deleted text [Comment]

# **Development Principles**

- 5. Be <u>landscape led and</u> of a high standard of design with particular attention to be paid to structural and detailed landscaping (to promote and deliver a continuous and homogeneous landscape approach to the allocation as a whole), layout, scale, height, detailed design, and massing to ensure that the development responds to local character and its overall setting. Planning applications for development should be informed by a landscape and visual impact assessment, biodiversity and heritage studies and the initial outline/ hybrid applications should be assessed by a Design Review Panel, at least once at pre-application stage and once following submission of a planning application; [to reflect the changes to the site specific policies below]
- 6. Incorporate zero and low carbon development, in line with the Future Homes Standards, or any future national update, the requirements of EN3, provide an exemplar scheme with climate change mitigation and adaptation measures and sustainable development principles in relation to the design, construction and operational stages; [to reflect the recent ministerial statement]
- 7. Meet the informal and formal recreational needs of the development and provide areas of green and open space [as shown schematically on Map 28], and biodiversity objectives of Policy EN9 and which where possible integrates with neighbouring Parcels to ensure a consistent and legible functional and visual relationship between them. This should incorporate a scheme of management of communal spaces and green infrastructure within the eastern and western parcels including provision for management and funding, initial community and stakeholder involvement with amenity, landscape, and biodiversity objectives for a period of 30 years from the completion of the development; [moved from Masterplanning Criterion v]
- 9. Consider the potential for mineral deposits on land to the West of Paddock Wood and make provision for any viably workable minerals to be extracted prior to development commencing on the site, where this is practical and environmentally feasible. [to reflect our understanding of the situation, as set out in para 1.10]
- 11. Provide walking and cycling linkages within and between each parcel, together with links to Paddock Wood town centre, existing and new employment areas, and surrounding countryside in accordance with Policy TP2; [to provide clarity]
- 13. The development proposals for the whole of the allocated area shall embed garden settlement principles. Proposals for each Parcel should give effect to this requirement and be guided by the Council's Structure Plan for the whole of the allocation as set out in the Appendix XX to this Local Plan [to reflect recent discussions with officers and negate the need for any separate SPD]
- 14. Proposals for the piecemeal development of individual sites in the Eastern and Western Parcels that do not conform to the above requirements as a whole will not be permitted; and [Suggest this becomes Criterion 15]
- 15. The development to be delivered to be in accordance with a Framework Masterplan Supplementary Planning Document (SPD) Further, joint masterplans for the West of Paddock Wood and (separately) the East of Paddock Wood should be prepared by the respective developers with the Council and relevant statutory consultees and submitted for approval with the individual

planning applications to show comprehensive and cohesive development. [Suggest this becomes Criterion 14] [to reflect recent discussions with officers and negate the need for any separate SPD]

### Masterplanning

<u>As set out above at [suggested]</u> <u>Criterion 14,</u> the new development shall be delivered through a <u>joint</u> masterplan approach <u>for the West of Paddock Wood and (separately) the East of Paddock Wood.</u>

- i. All development proposals in relation to the Eastern and Western parcels shall be in accordance with an approved the appropriate Masterplan relating to each parcel that will respect the above requirements and take into account the Council's Structure Plan SPD. Where development parcels abut each other and developers have worked collaboratively on masterplanning, this will be supported where it meets the other aims and objectives in this policy. The masterplan shall be submitted to the Council for its approval as part of the initial application for planning permission in relation to (any part of) the relevant Parcel. [to reflect recent discussions with officers and negate the need for any separate SPD]
- v. Incorporate a green and blue infrastructure (GBI) plan which is informed by a comprehensive wildlife and habitat survey and heritage and landscape character assessments. This should incorporate a scheme of management of communal spaces and green infrastructure within the eastern and western parcels including provision for management and funding, initial community and stakeholder involvement with amenity, landscape and biodiversity objectives for a period of 30 years from the completion of the development: [Suggest moving to amended Criterion 7 of Development Principles]
- vi. Show how the development will incorporate the full range of sustainable transport measures, the proposed transport links, including access to the development and main internal highway links and all intended links within the site and to the surrounding footpath and cycleway and bridleway network, including proposed and potential footpath and cycleway and bridleway links to the wider area. All pedestrian and cycle links through the allocated site should be convenient and highly legible; [to provide clarity]
- ix. Show how the development will incorporate the full range of sustainable transport measures; [moved to Criterion vi. above]
- xiii. The masterplans for the East and West Paddock Wood shall include a phasing and implementation plan which shall identify the phasing of development across the whole of the relevant Parcel to ensure that the development will be carried out in a manner that co-ordinates the implementation and occupation of the development and the timely delivery of such necessary on and off-site infrastructure as shall be reasonably required to support the development and occupation of each Parcel and its proper integration with neighbouring Parcels and the timely provision of Parcel specific and shared infrastructure taking into account Table 11 of the Council's SSMIS dated February 2021 as may be updated, following consultation with relevant parties, from time to time) or as may otherwise be reasonably required. [to reflect our comments in section 1.12 above]

# Strategic Infrastructure

The development shall be delivered in accordance with <u>the</u> phasing and implementation plan <u>as</u> <u>approved under Criterion xiii above</u>, <u>which shall be required to be <u>and</u> secured by conditions and/or s.106 obligations <u>to individual developer applications</u> to ensure that:.....[to provide clarity]</u>

- (1) the timely payment of proportionate contributions towards the carrying out and/or implementation of strategic and other necessary highway mitigation works and improvements, education and health provision and other necessary infrastructure as identified in the Council's Strategic Sites Masterplanning and Infrastructure Study as updated from time to time, following consultation with relevant parties, and/or [to reflect our comments in section 1.12 above]
  - h) The delivery of secondary school provision equivalent to 3 Forms of Entry (3FE) within the North-Western development parcel, unless it is demonstrated that through feasibility studies that the provision can be deliver d through other means such as expansion of existing secondary school provision; The delivery of secondary school provision equivalent to up

to 3 Forms of Entry (3FE). Subject to the current feasibility study, this may be delivered through the expansion of Mascalls Academy or through the provision of a safeguarded site within the North-Western development parcel (both alternatives are shown on the Revised Map 28). If the latter is required, the safeguarded site will need to be able to accommodate a 4FE school as a minimum, with the land available to expand to 6FE should it be required. Kent County Council will fund the additional classrooms beyond the 3FE, if required. [to reflect our understanding of the situation, as set out in paras 3.7 – 3.9 inclusive]

# Policy SS/STR 1(C) – South Eastern Parcel Requirements

- II. A mix of housing in accordance with policy H1, to include specialist extra care accommodation for the elderly in accordance with policy H6; [Duplicates Criterion 3 and 4 of Development Principles]
- III. A scheme designed with a landscape led approach; [Duplicates Criterion 5 of Development Principles, as suggested to be amended above]
- IV. Provide walking and cycling linkages within the site connecting to adjacent development parcels, existing walking and cycling infrastructure including together with links to Paddock Wood town centre, existing and new employment areas, and surrounding countryside in accordance with policy TP 2; [Duplicates Criterion 11 of Development Principles, as suggested to be amended above]
- V. Safeguarding of land north of Chanters Hill for the possible expansion of Mascalls Academy if required.
- VI. Incorporate zero and low carbon energy production, in line with the requirements of policies EN 1 and EN 3; [Duplicates Criterion 6 of Development Principles, as suggested to be amended above]
- VII. Provide areas of green and open space; [Duplicates Criterion 7 of Development Principles]
- VIII. Shall demonstrate particular regard for the setting of the High Weald AONB;
- IX. Subject to being viable a Local centre providing up to 700sqm commercial floorspace (Use Class E(a) to (f)) in total; [to reflect our comments in section 1.20 above]
- X. Incorporate zero and low carbon development, in line with the requirements of policies EN 1 and EN 3; [Duplicates Criterion 6 of Development Principles, as suggested to be amended above]
- XI. Phasing and contribution towards strategic infrastructure delivery as set out in STR/SS 1; [Duplicates first sentence of strategic Infrastructure as suggested to be amended]
- XII. Provision of water supply and access to wastewater treatment facilities;
- XIII. Control of flood risk through use of Sustainable Drainage Systems, to facilitate a reduction in the overall flood risk of the site and surrounding area, in accordance with policies EN 24, EN 25, and EN 26; and
- XIV. Development to be delivered to be in accordance with a Framework Masterplan Supplementary Planning Document (SPD). [Duplicate of Criterion 13 of Development Principles]

# Policy SS/STR 1(D) – North Eastern Parcel Requirements

- ii A scheme designed with a landscape led approach; [Duplicates Criterion 5 of Development Principles, as suggested to be amended above]
- iii Land for a two-form entry primary school;
- Provide walking and cycling linkages within the site connecting to adjacent development parcels, existing walking and cycling infrastructure including together with links to Paddock Wood town centre, existing and new employment areas, and surrounding countryside in accordance with policy TP 2; [Duplicates Criterion 11 of Development Principles, as suggested to be amended above]
- v Incorporate zero and low carbon development, in line with the requirements of policies EN 1 and EN 3. [Duplicates Criterion 6 of Development Principles, as suggested to be amended above]
- vi Phasing and contribution towards strategic infrastructure delivery as set out in STR/SS 1; [Duplicates first sentence of strategic Infrastructure as suggested to be amended]
- vii Provide areas of green and open space; [Duplicates Criterion 7 of Development Principles]
- viii Development should make use of, and enhance, the Hop Pickers Trail;
- ix Shall demonstrate particular regard for the setting of the High Weald AONB;
- x Provision of water supply and access to wastewater treatment facilities;

- xi Control of flood risk through use of Sustainable Drainage Systems, to facilitate a reduction in the overall flood risk of the site and surrounding area in accordance with policies EN 24, EN 25, and EN 26; and
- xii Development to be delivered to be in accordance with a Framework Masterplan Supplementary Planning Document (SPD). [Duplicate of Criterion 13 of Development Principles]
